

Employee FAQ:

Health Savings Accounts

What is a health savings account (HSA)?

An HSA is a tax-advantaged personal savings account that can be used to pay for medical, dental, vision and other qualified expenses now or later in life. To contribute to an HSA you must be enrolled in a qualified high-deductible health plan (HDHP) and your contributions are limited annually. The funds can even be invested, making it a great addition to your retirement portfolio.

Why should I participate in an HSA?

Funds contributed to an HSA are triple-tax-advantaged.

- 1. Money goes in tax-free.** Most employers offer a payroll deduction through a Section 125 Cafeteria Plan, allowing you to make contributions to your HSA on a pre-tax basis. The contribution is deposited into your HSA prior to taxes being applied to your paycheck, making your savings immediate. You can also contribute to your HSA post-tax and recognize the same tax savings by claiming the deduction when filing your annual taxes.
- 2. Money comes out tax-free.** Eligible healthcare purchases can be made tax-free when you use your HSA. Purchases can be made directly from your HSA account, either by using your benefits debit card, ACH, online bill-pay, or check – or, you can pay out-of-pocket and then reimburse yourself from your HSA.
- 3. Earn interest, tax-free.** The interest on HSA funds grows on a tax-free basis. And, unlike most savings accounts, interest earned on an HSA is not considered taxable income when the funds are used for eligible medical expenses.

What expenses are eligible for reimbursement?

Health plan co-pays, deductibles, co-insurance, vision, dental care, and certain medical supplies are covered. The IRS provides specific guidance regarding eligible expenses. (See IRS Publication 502).

Am I eligible to participate?

In order to contribute, you must be enrolled in a qualified HDHP, not covered under a secondary health insurance plan, not enrolled in Medicare, and not another person's dependent. There are no eligibility requirements to spend previously-contributed HSA funds.

What is a high-deductible health plan?

A HDHP is a health insurance plan with deductible amounts that are greater than \$1,600 for individual or \$3,200 for family coverage and have an out-of-pocket maximum that does not exceed \$8,050 for individual or \$16,100 for family coverage.

How do I contribute money to my HSA?

Payroll deduction is most likely offered by your employer. Your annual contribution will be divided into equal amounts and deducted from your payroll before taxes. Direct contributions can also be made from your personal checking account and can be deducted on your personal income tax return.

Can I change my contributions to my HSA during the year?

Yes. You will not be subject to the change-in-status rules applicable to other benefit accounts. You will be able to make changes in your contributions by providing the applicable notice of change provided by your employer.

How much can I contribute to my HSA?

Contributions can be made by the eligible employee, their employer, or any other individual. Annual contributions from all sources may not exceed \$4,150 for singles or \$8,300 for families in 2024. Individuals aged 55 and over may make an additional \$1,000 catch-up contributions.

Do I have to spend all my contributions by the end of the plan year?

No. HSA money is yours to keep. Unlike a flexible spending account (FSA), unused money in your HSA isn't forfeited at the end of the year; it continues to grow, tax-deferred.

What happens if my employment is terminated?

HSAs are portable and move with you if you change employment. Your HSA belongs to you, not your employer, just like your personal checking account.

How do I access the funds in my HSA?

Your HSA is similar to a checking account. You are responsible for ensuring the money is spent on qualified purchases only and maintaining records to withstand IRS scrutiny. Payments can be made via check, ACH, online bill-pay, or debit card, depending on what is available to you.

When must contributions be made to an HSA for a taxable year?

Contributions for the taxable year can be made in one or more payments at any time after the year has begun and prior to the individual's deadline (without extensions) for filing the eligible individual's federal income tax return for that year. For most taxpayers, the deadline is April 15 of the year following the year for which contributions are made.

What happens to the money in my HSA if I no longer have HDHP coverage?

Once you discontinue coverage under an HDHP and/or get secondary health insurance coverage that disqualifies you from an HSA, you can no longer make contributions to your HSA. However, since you own the HSA, you can continue to use the remaining funds for future healthcare expenses.

Is tax reporting required for an HSA?

Yes. IRS form 8889 must be completed with your tax return each year to report total deposits and withdrawals from your account. You do not have to itemize to complete this form.

Can I still deduct healthcare expenses on my tax return?

Yes, but not the same expenses for which you have already been reimbursed from your HSA.

Can I withdraw the money for non-healthcare purchases?

Yes. If you withdraw the money for an unqualified expense prior to age 65, you'll be subject to your ordinary income tax, in addition to 20% tax penalty. You can withdraw the money for any reason without penalty after age 65, but are subject to applicable income taxes.

Can I roll over or transfer funds from my HSA or Medical Savings Account (or Archer MSA) into an HSA?

Yes. Pre-existing HSA funds or MSA monies may be rolled into an HSA and will continue their tax-free status.

Can I control how the funds are invested?

Yes. Once your HSA cash account balance reaches \$1,000, you can transfer funds to an HSA investment account by selecting the model that fits your needs. There are three options you can choose from:

MANAGED: Designed for novice investors who prefer to have our advisor tool automatically select and re-balance investments on an ongoing basis in accordance with their age and/or risk profile. This account type delivers a "do-it-for-me" approach to investing.

SELF DIRECT: Designed for intermediate investors who have the desire to self-select from a menu of monitored investment options covering multiple asset classes to diversify their portfolio, and then re-balance their portfolio manually. This account type provides a balance between do-it-for-me and DIY approaches to investing.

BROKERAGE: Designed for adept investors who desire to perform advanced research and trading across hundreds of individual stocks and exchange-traded funds (ETFs). This account type offers a hands-on, DIY approach to investing.

Can I transfer funds between the cash and investment accounts?

Yes. You can transfer money between your HSA cash and HSA investment account at any time. A full suite of exchange traded funds (ETFs) traded in real-time provide you with lower costs. When your balance exceeds \$1,000, you can immediately move assets into your investment account during market hours, Monday - Friday, 9:30 a.m. - 3:55 p.m. ET, rather than waiting the 24-48 hours that is common in other investment portfolios.
